

Mahavir Education Trust's

Shah & Anchor Kutchhi Engineering College

Chembur, Mumbai-400088

An Autonomous Institute Affiliated to University of Mumbai

Vision & Mission

Institute Vision

To become a globally recognized institution offering quality education and enhancing professional standards

Institute Mission

To impart high quality technical education to the students by providing an excellent academic environment, well-equipped laboratories and training through motivated teachers.

Department Vision

To be a globally recognized department that provides quality education in cybersecurity, promotes ethical practices, and prepares professionals to tackle real world challenges.

Department Mission

1. To deliver high-quality cybersecurity value-based education and enhancing the teaching-learning process for professional excellence.
2. To promote research, industry collaboration and entrepreneurship to address global challenges in cybersecurity.

Introduction

Name: Satvik Trivedi

Program: B.Tech Cyber Security

Company: CyberFrat Pvt Ltd

Role: Cybersecurity & IT Intern

Internship Period: 6 Months

Internship Role and Objectives

Organization : CyberFrat Pvt Ltd

Role Assigned

- Managing IT and cybersecurity-related operational activities across the organization

Core Responsibilities

- Administering the LMS platform and application content
- Handling technical queries from users and internal teams
- Managing internal IT support and user access issues
- Supporting IT asset tracking and coordination
- Assisting in onboarding and offboarding activities
- Maintaining smooth day-to-day platform operations

Objectives

- Ensure reliable functioning of digital learning systems
- Provide timely support for technical and platform-related issues
- Strengthen operational efficiency across LMS and app environments

Tasks Performed

Tasks Executed	Technical Exposure Gained
• Supervised LMS activities and backend administrative functions • Resolved course access and account-related user issues • Provided technical support for internal system-related problems • Managed content updates and coordination on the company application • Addressed app-related user queries and usage concerns • Supported platform continuity by monitoring routine operational issues	• LMS administrative workflow handling • App content management and platform coordination • User issue diagnosis and technical support • Internal IT operations management • Digital platform support processes

Projects Handled

Project Title - CyberFrat Mobile Application

Project Involvement

- Performed functional testing from both user and admin perspectives
- Reviewed platform usability and feature accessibility
- Reported bugs, content issues, and operational inconsistencies
- Shared observations for improving app flow and user experience
- Assisted in validating content and administrative actions on the platform

Project Outcome

- Contributed to smoother app performance and better content delivery
- Helped improve administrative efficiency and end-user experience
- Supported refinement of application usability through continuous testing

Technologies / Tools Used

Tools and Platforms

- Bitdefender
- Microsoft Admin
- Learning Management System (LMS)
- CyberFrat Application Admin Panel

Operating Environment

- Windows-based systems

Usage Areas

- Endpoint security monitoring
- User and admin account management
- LMS backend administration
- App content and support operations

Key Learnings and Outcomes

Technical Learnings

- Practical exposure to LMS and app administration
- Understanding of Microsoft Admin for organizational account handling
- Better knowledge of endpoint security practices through Bitdefender
- Experience in content coordination and platform-level issue resolution
- Exposure to company privacy, security, and access control practices

Professional Skills Developed

- Problem-solving under operational pressure
- Client handling and user support communication
- Platform coordination and administrative management
- Attention to detail while handling content and access issues
- Adaptability in multi-tasking environments
- Decision-making in day-to-day support scenarios
- Time management and task prioritization

Challenges Faced and Solutions

Challenges Faced	Solutions Implemented
Managing both LMS and application-related responsibilities at the same time	Prioritized tasks based on urgency and maintained structured follow-up for each issue
Handling repeated user queries related to access, content, and platform usage	Improved response clarity and developed a better understanding of common issue patterns for faster resolution
Adjusting to administrative tools and workflows such as LMS panels and Microsoft Admin	Learned through hands-on practice, observation, and regular coordination with internal team members

Conclusion

Sustainable Development Goal (SDG) Mapping

- ❑ **SDG 9 – Industry, Innovation & Infrastructure** – Secure digital infrastructure
- ❑ **SDG 16 – Peace, Justice & Strong Institutions** - Protection from cybercrime

Major Outcomes	Career Relevance
• Improved understanding of IT administration in a working organization • Practical exposure to application and LMS operational management • Better understanding of security controls, access management, and privacy practices • Strengthened communication, coordination, and support-handling skills	• Cybersecurity operations • IT administration • Compliance and governance support • Security coordination and platform management
