

Mahavir Education Trust's

# Shah & Anchor Kutchhi Engineering College

Chembur, Mumbai-400088

An Autonomous Institute Affiliated to University of Mumbai

# Vision & Mission

## Institute Vision

To become a globally recognized institution offering quality education and enhancing professional standards

## Institute Mission

To impart high quality technical education to the students by providing an excellent academic environment, well-equipped laboratories and training through motivated teachers.

## Department Vision

To be a globally recognized department that provides quality education in cybersecurity, promotes ethical practices, and prepares professionals to tackle real world challenges.

## Department Mission

1. To deliver high-quality cybersecurity value-based education and enhancing the teaching-learning process for professional excellence.
2. To promote research, industry collaboration and entrepreneurship to address global challenges in cybersecurity.

# Introduction

**Name:** Satvik Trivedi

**Program:** B.Tech Cyber Security

**Company:** CyberFrat Pvt Ltd

**Role:** Cybersecurity & IT Intern

**Internship Period:** 6 Months

# Internship Role and Objectives

**Organization :** CyberFrat Pvt Ltd

**My Role:** Cybersecurity & IT Intern

- **Role Assigned**
- Handling IT and cybersecurity related responsibilities of the organization
- **Key Responsibilities**
- Managing the Learning Management System (LMS) platform
- Resolving client technical queries related to courses
- Handling internal IT issues within the organization
- Managing company IT assets
- Employee onboarding and offboarding support
- Ensuring smooth functioning of the company learning platform

# Tasks Performed – January

| Activities Performed                                                                                                                                                                                                                                         | Technical Skills Learned                                                                                                                                                    |

The screenshot shows a course interface for "CCSK- Certificate of Cloud Security a...". The top navigation bar includes a back arrow, the course title, "Discuss (0)", a "Previous" link, and a "Complete and Continue" button. A progress bar indicates "17% completed in 39m". The left sidebar lists "Course Discussions" with a "Discovery" section containing "Domain 3" and "Session on Legal Issues, Contracts, and Electronic Discovery", and a "Domain 4: Compliance and Audit Management" section containing "Domain 4". The main content area features a dark blue header with a user profile card (learn.cyberfrat.com, chitellaca@gmail.com, +919910155691) and a loading spinner. Below this is the title "Session on Legal Issues, Contracts, and Electronic Discovery" and a "Discuss" button.

# Projects Handled

## Project Title - CyberFrat Mobile Application

### Project Activities

- Performing application testing from user perspective
- Testing administrative functionalities of the application
- Identifying bugs and usability issues
- Providing feedback for improvements in app performance

### Outcome

- Improved application reliability and user experience
- Identification of functional issues before deployment
- Support in enhancing platform stability for users

# Technologies / Tools Used

## Security Tools

- Bitdefender (Endpoint Security)

## Operating Systems

- Microsoft Windows Environment

## Platforms

- Learning Management System (LMS) platform
- Internal IT infrastructure systems

# Key Learnings and Outcomes

## Technical Learning

- Understanding enterprise security tools such as Bitdefender
- Learning how organizational security policies are implemented
- Exposure to privacy policies and compliance requirements
- Practical experience in managing LMS systems

## Professional Skills Developed

- Analytical thinking and problem solving
- Communication with clients and internal teams
- Team collaboration
- Handling real-world IT support situations

# Challenges Faced and Solutions

| Challenges Faced                                           | Solutions Implemented                                                                    |
|------------------------------------------------------------|------------------------------------------------------------------------------------------|
| Dealing with upset clients while resolving platform issues | Maintained patience and improved communication to understand and resolve client concerns |
| Handling multiple IT issues across the organization        | Applied systematic troubleshooting methods to identify and resolve technical problems    |
| Learning LMS management initially                          | Consulted senior managers and used trial-and-error to gain hands-on understanding        |

# Conclusion

## Sustainable Development Goal (SDG) Mapping

- ❑ **SDG 9 – Industry, Innovation & Infrastructure** – Secure digital infrastructure
- ❑ **SDG 16 – Peace, Justice & Strong Institutions** - Protection from cybercrime

| Learnings                                                                                                                                                                                                                                                                          | Impact                                                                                                                                                                                                                                                                                               |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"><li>• This internship provided valuable exposure to practical IT and cybersecurity operations within an organization.</li><li>• It helped develop technical, analytical, and communication skills required in real-world environments.</li></ul> | <ul style="list-style-type: none"><li>• Experience in IT infrastructure management</li><li>• Exposure to company cybersecurity and privacy policies</li><li>• Practical problem-solving in technical environments</li><li>• Understanding compliance and organizational security practices</li></ul> |

The experience of working with security policies, audits, and organizational IT management will help in building a career in cybersecurity compliance, governance, and security operations.
